Love Strong in Death. BY ESENEZER ELLIOT. We watched while the moonlight Beneath the shadow'd hill, Seem'd dreaming of good angels, And all the woods were still. The brother of two sisters Drew painfully his breath: A strange fear had come o'er him. For love was strong in death. The fire of fatal fever Burn'd darkly on his cheek, And often to his mother

I felt as if from slumber I never could awake: O, mother, give me something To cherish for your sake! A cold, dead weight is on me, A heavy weight like lead; My hands and feet seem sinking Quite through my little bed:

He spoke or tried to speak

I am so tired, so weary-With weariness I ache: O, mother, give me something To cherish for your sake : Some little token give me, Which I may kiss in sleep-

To make me feel I'm near you,

My sisters say I'm better-

I surely am awake:

Ah, yes! the loving spirit

A mother and two sisters

And bless me, though I weep.

But, then their heads they shake : O, mother, give me something To cherish for your sake! Why can't I see the poplar, The moonlit stream and hill, Where, Fanny says, good angels Dream when the woods are still! Why can't I see you mether ?

Oh, haste, and give me something To cherish for your sake ! His little bosom heaves not; The fire hath left his cheek: The fine chord-is it broken ! The strong chord-could it break ?

Look down on lifeless clay. The following beautiful tribute to the memory Sir Robert Peel is copied from Punch: Our "In Memorlam."

Hath winged its flight away:

Not in the splendor of a ruinous glory, Emblazoned, glitters our lost statesman's name : The great deeds that have earned him deathless fame, Will cost us merely thanks. Their inventory Of peaceful hereism will be a story, Of wise assertion of a rightful claim, And commerce freed by sagely daring aim. Famine averted; revolution gory Disarmed; and the exhausted commonweal Recruited; these are things that England long Will couple with the name of Robert Peel, Of whom the worst his enemies can say Is, that he left the error of his way When conscience told him he was in the wrong.

THE DUKE'S BREECHES .- The following good story of a laughable occurrence between the Duke of Wellington and the Bishop of London, we find in the

valuable correspondence of the St. Louis Republican : "A good anecdote of the Duke of Wellington has just appeared. It seems that Mrs. C. J. London. the learned lady horticulturist, wrote a note to the Duke requesting to see his becches, (the Duke owns a very fine beech-wood.) The note was signed C. J. London, but the Duke read it C. J. London, and supposed it came from the Bishop of London, whose name is Charles James, and who always signs himself C. J. London. In reading the note, instead of beeches, he read breeches. What can be mean? said the Duke. At last he concluded that the Bishop must, for some purpose or other, want to see the breeches he wore at Waterloo-so he had them sent to him. The worthy Bishop, astonished at receiving such a package from the Duke, remained awhile, and finally concluded that the Iron Duke was out of his mind: so off he posted to tell the afflicting news to Lord John Russell. The Duke in the mean while had thought the matter over, and at last determined in his mind that the Bishop of London was crazy. He immediately ordered his carriage and went to inform Lord John Russell of the sad state of one of the heads of the church. He there met the Bishop himself, and after a most amusing scene, the letter was shown, attentively read, and the whole finally ex-

Ulter Cured of Seven Years Standing.
This cure was effected in July, 1844; there have been no mptoms of a return, and her health still continues good,

Messrs. Sands-Gentlemen: I consider it but an act of justice to you to state the following facts in reference to the great benefit I have received in the cure of an obstinate Cancerous

ed with caustic, three times a day, and for six it was daily bone, and said the disease was advancing rapidly to the lungs, and if I did not get speedy relief by medicine or by an operation, the result would be fatal. I was advised to have the breast laid open and the bones examined; but finding no re-

ting worse, I almost despaired of recovery, and considered my case nearly hopeless. Seeing various testimonials and certificates of cure by the ase of Sands' Sarsaparilla, in cases similar to my own, I con-cluded to try a few bottles, several of which were used, but, ble cure for my case, I persevered until the disease was entire-

Please excuse this long deferred acknowledgment, which I think it my duty to make. Your valuable Sarsaparilla cured me, with the blessing of Divine Providence, when nothing else could; and I feel myself under lasting obligations to you-I can say many things I cannot write, and I do most respectfully invite ladies afflicted as I have been to call upon me, and I will satisfy them fully of the truth as stated above, and ma-

This excellent compound, which is creating such a universal interest throughout the country, has made its way successfully into the favor of our citizens and the people around us. We have read again and again of the efficacy of this invaluable medicine-if we can call a very pleasant beverage medicine -but not until recently have we had any positive proof which could induce us to speak fairly of it. But, from facts in our session, we are now well convinced that, without any ex-
